STATEMENT OF PRACTICAL TREATMENT

This product is an organophosphate.

IF IN EYES: Flush with plenty of water. Get medical attention immediately.

IF SWALLOWED: Call a physician or poison control center immediately. DO NOT INDUCE VOMITING UNLESS NO OTHER TREATMENT IS AVAILABLE. Vomiting may cause aspiration pneumonia. If it is necessary to induce vomiting, do so under medical supervision. Give victim 1 or 2 glasses of water and insert finger in back of throat. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

IF ON SKIN: Remove contaminated clothing and wash skin with plenty of soap and water. Get medical attention.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth unless exposure was due to swallowing; then use cardiopulmonary resuscitation (CPR). Get medical attention.

NOTE TO PHYSICIAN: Lavage stomach with care to prevent aspiration into lungs. After lavage, instill and leave 30 gm. activated charcoal in 3-4 oz. of water. Atropine sulfate and 2-PAM are specific antidotes. Morphine, theophylline, aminophylline, and large amounts of intravenous fluids are contraindicated.
